

CSC 1300 LAB 9 RUBRIC Spring 2026

Course: CSC 1300 Spring 2026 Lecture & Lab

Criteria	Excellent	Good	Fair	Unacceptable	Criterion Score
Program Execution	15 points Program executes correctly with no syntax or runtime errors.	10 points Program compiles and executes but has a minor (easily-fixed) runtime error.	5 points Program doesn't compile due to minor error or errors.	0 points Program does not compile or execute (many errors).	/ 15
Parallel Implementation (OpenMP)	20 points OpenMP directives correctly implemented before for loop; threads explicitly set using <code>omp_set_num_threads</code> ; loop variables private; program runs faster on large datasets vs sequential.	15 points OpenMP partially working (e.g., threads set but directive placement incorrect).	10 points OpenMP not working even though there are <code>#pragma</code> directives in the code. Didn't follow instructions exactly.	0 points Didn't implement OpenMP	/ 20
Program Functionality & Logic	15 points Program correctly reads text files, processes vector elements, prepends character count, and sorts alphabetically as required.	10 points Minor logic errors in loop or sorting but overall program runs and outputs mostly correct.	5 points Logic errors in loop/sorting but overall program runs.	0 points Incorrect logic or missing major requirements (e.g., no sorting or string processing).	/ 15
Results Collection & Analysis (results.txt)	15 points results.txt includes accurate timings for all required text files, thread tests (4, 2, 500), and answers all questions clearly and thoughtfully.	10 points Partial data collected or some questions missing detail or accuracy.	5 points results.txt is not complete. Not all questions were answered.	0 points results.txt missing or mostly incomplete.	/ 15
Program Output Readability	10 points Output clearly labeled ("Computation time for sequential/parallel = X.XXX seconds"), neatly formatted, and matches sample output.	7 points Minor spelling or formatting issues but output is mostly readable.	4 points Major spelling or formatting issues - hard to read output.	0 points Output is incorrect or missing.	/ 10

Criteria	Excellent	Good	Fair	Unacceptable	Criterion Score
Documentation & Commenting	15 points Includes top comment block with filename, author(s), date, purpose; each function and major section clearly commented; good indentation.	10 points Minor issues with indentation or missing some comments.	5 points Major issues with indentation or missing many comments.	0 points Poorly formatted or no commenting present.	/ 15
Filled out Lab Report	10 points Screenshot (lab9ReportProof) of Qualtrics confirmation page included and properly named.	7 points	4 points	0 points Missing proof screenshot of Lab Report submission.	/ 10

Total	/ 100
