

Lab #1: Introduction to Java

Goals

After completing this assignment, you should be able to:

- Download a zipfile from Google Classroom
- Unzip or extract a zipfile
- Rename a VSCode project folder
- Open a Java project with VS Code
- Run and edit Java programs with VSCode
- Zip a VSCode project
- Upload a zipped project to Google Classroom

Part 1: Install VSCode (VSC) and Java

[Instructions to install Java and VSCode are here!](#)

Part 2: Download and unzip this week's lab

It's the lab01.zip on Google Classroom under "Lab01".

Instructions to download, unzip, and run Java projects [are here!](#)

Part 3: Do the assignment

Follow along with the instructions in the Google Form attached to Lab01 on Google Classroom.

Basically, you have some Java code that you've never seen before, and you will make some small changes to see example error messages, and to change the output of the code in small ways.

What to submit

- Be sure to click "Submit" on your Google Form
- Zip your project folder and submit the zipfile to Google Classroom
 - First Rename the folder `intro-java` to your email username
 - For example I would rename `intro-java` to `jspacco`
- Zip or Compress the entire folder
 - [How to zip on Windows](#)
 - [How to zip on Mac](#)

Grading Rubric

- 30: Did you answer all of the questions? They don't have to be correct; you just need to have a good-faith answer to each question
- 10: Did you rename the folder to include your email username?
- 10: Did you submit a zipfile of your project folder?
