

CS 142: Program design & methodology

3/26/25

This course will...

- ...continue to develop your programming skills from CS 141
- ...begin teaching you how to optimize program efficiency/speed
- ...begin covering “higher-level” program organization so you can think about programs in larger units than statements and methods

Materials

- No required textbook (there is an optional reference)
- Google Classroom and course website (<http://courses.knox.edu/cs142/>)
- Clicker (i>clicker+) for in-person lectures
- VS Code for programming

Peer Instruction

- Lectures have multiple choice questions
 - You answer, discuss, and then re-answer
 - Discussion is key!

Read the collaboration policy

Collaboration: What isn't allowed?

- Any collaboration on an exam
- Copying code from any source (even if variable names or comments are changed)
- Working together without crediting the other person

Succeeding in this course

- Come to class and participate
- Complete every assignment
- Come to my office or send me an email if something doesn't make sense or you are stuck

Note the late policy

- Deadlines actually 8 hours later
- Can submit 2 assignments a day late or 1 assignment later than that (but within 2 weeks)
- Other extensions require extraordinary circumstances, but don't hesitate to talk to me
